EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Specification:

Page 7, line 15, changed "A value" to -- A measured value of the coefficient of static friction--.

The context implied that the "value of 0.2" was a measured value of the coefficient of static friction of an uncoated pan, but the examiner believed that the specification should have been amended to expressly say so in order to avoid confusion. Applicant's attorney agreed to this change in principle in the last interview, but apparently forgot to make the necessary change to the written description.
